MOBILE LEADED BARRIERS

French Fab

The mobile leaded barrier for radiology.

Our Barriers are entirely **made and manufactured** in our workshops of Fabrix at Poitiers

Optimize staff safety with custom-made leaded protective barriers,

Our mobile leaded barriers provide efficient protection against X-Rays, while ensuring total visibility thanks to their leaded glass.
Ideal solutions for marking-off risk areas in your radiology room, our screens are the reliable solution that meets your requirements.

MOBILE LEADED BARRIERS WITH RECOGNIZED FUNCTIONALITY

The **mobile leaded screens** are **practical X-Ray protection solutions**, essential for protecting staff working in close proximity to the source of radiation.

These solutions allow to :

- **Protect** the staff in his workspace,
- **Easily move** the safety zone according to needs inside the radiology room,
- **Keep** constant eye contact with the patient or equipment thanks to their panoramic X-Ray glass.
